

BLANK PAGE

1 Solve the inequality $|2x + 3| > 3|x + 2|$.

[4]

Blank lined paper with horizontal ruling lines.

- 2 On a sketch of an Argand diagram, shade the region whose points represent complex numbers z satisfying the inequalities $|z + 2 - 3i| \leq 2$ and $\arg z \leq \frac{3}{4}\pi$. [4]

The variables x and y satisfy the equation $x^n y^2 = C$, where n and C are constants. The graph of $\ln y$ against $\ln x$ is a straight line passing through the points $(0.31, 1.21)$ and $(1.06, 0.91)$, as shown in the diagram.

Find the value of n and find the value of C correct to 2 decimal places.

[5]

[illegible]

- 4** The parametric equations of a curve are

$$x = 1 - \cos \theta, \quad y = \cos \theta - \frac{1}{4} \cos 2\theta.$$

Show that $\frac{dy}{dx} = -2 \sin^2\left(\frac{1}{2}\theta\right)$. [5]

[illegible]

- 5** The angles α and β lie between 0° and 180° and are such that

$$\tan(\alpha + \beta) = 2 \quad \text{and} \quad \tan \alpha = 3 \tan \beta.$$

Find the possible values of α and β .

[6]

[illegible]

- 6** Find the complex numbers w which satisfy the equation $w^2 + 2iw^* = 1$ and are such that $\operatorname{Re} w \leq 0$. Give your answers in the form $x + iy$, where x and y are real. [6]

Handwriting practice lines on a white background. The page contains 20 horizontal rows of dotted lines for tracing and writing practice. A small circular logo is visible in the bottom right corner, featuring the text 'AHEAD' and a red apple icon.

- 7 (a) By sketching a suitable pair of graphs, show that the equation $4 - x^2 = \sec \frac{1}{2}x$ has exactly one root in the interval $0 \leq x < \pi$. [2]

- (b) Verify by calculation that this root lies between 1 and 2. [2]

.....

.....

.....

.....

.....

.....

- (c) Use the iterative formula $x_{n+1} = \sqrt{4 - \sec \frac{1}{2}x_n}$ to determine the root correct to 2 decimal places. Give the result of each iteration to 4 decimal places. [3]

.....

.....

- 8** (a) Find the quotient and remainder when $8x^3 + 4x^2 + 2x + 7$ is divided by $4x^2 + 1$. [3]

Blank lined paper for writing.

(b) Hence find the exact value of $\int_0^{\frac{1}{2}} \frac{8x^3 + 4x^2 + 2x + 7}{4x^2 + 1} dx$. [5]

[illegible]

- 9** The variables x and y satisfy the differential equation

$$(x+1)(3x+1)\frac{dy}{dx} = y,$$

and it is given that $y = 1$ when $x = 1$.

Solve the differential equation and find the exact value of y when $x = 3$, giving your answer in a simplified form. [9]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. In the bottom right corner, there is a small, partially visible circular logo with the word "AHEAD" written in a curved path. The rest of the page is empty.

- 10** The points A and B have position vectors $2\mathbf{i} + \mathbf{j} + \mathbf{k}$ and $\mathbf{i} - 2\mathbf{j} + 2\mathbf{k}$ respectively. The line l has vector equation $\mathbf{r} = \mathbf{i} + 2\mathbf{j} - 3\mathbf{k} + \mu(\mathbf{i} - 3\mathbf{j} - 2\mathbf{k})$.

- (a) Find a vector equation for the line through A and B . [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (b) Find the acute angle between the directions of AB and l , giving your answer in degrees. [3]

[4]

Blank lined paper for writing.

(a) Find the x -coordinate of M , giving your answer correct to 3 significant figures. [6]

[illegible]

- (b)** Using the substitution $u = \cos x$, find the area of the shaded region enclosed by the curve and the x -axis in the first quadrant, giving your answer in a simplified exact form. [5]

Handwriting practice paper with 20 horizontal dotted lines for writing.

[illegible]
