

Cambridge International AS & A Level

CANDIDATE NAME			
CENTRE NUMBER		CANDIDATE NUMBER	
MATHEMATIC	cs		9709/22
Paper 2 Pure N	Mathematics 2	Oct	tober/November 2020
	N	AHE	1 hour 15 minutes
You must answ	er on the question paper.		

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.

You will need: List of formulae (MF19)

- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

The diagram shows the curve with equation $y = \frac{x-2}{x^2+8}$. The shaded region is bounded by the curve and the lines x = 14 and y = 0.

Find $\frac{1}{dx}$ and hence determine	e the exact x-coordinates of the stationary points.	[4]

(b)	It is given that $\int_0^{\frac{1}{2}\pi} (3 + 4\cos^2\frac{1}{2}x + k\sin 2x) dx = 10.$
	Find the exact value of the constant k . [6]
	AHEAD

7

A curve has equation y = f(x) where $f(x) = x^4 - 5x^3 + 6x^2 + 5x - 15$. As shown in the diagram, the curve crosses the x-axis at the points A and B with coordinates (a, 0) and (b, 0) respectively.

(a)	Use the factor theorem to show that $(x - 3)$ is a factor of $f(x)$.	[2]
		•••••
		•••••
		••••
		••••

(b) By first finding the quotient when f(x) is divided by (x-3), show that

$$a = -\sqrt{\frac{3}{2-a}}.$$
